

Brain Writing Tool

To use the Brain Writing Tool follows these steps:

- Each participant needs a worksheet.
- Each participant writes down three ideas in the first row.
- Once all have completed that step, each person is to pass their worksheet to the right.
- Each participant reads the ideas in the previous row(s) then adds three more ideas.
- The worksheets are passed again and the process is repeated until the worksheets return to their starting positions.
- The team votes on the best ideas.
